

Arrow, Quantum and Veeam - better together.

Quantum.

VEEAM

The combination of Quantum and Veeam software enables customers to maximize business value by storing, sharing and preserving digital assets over their entire lifecycle.

Earn yourself a reward

For every meeting you arrange with one of our VEEAM partners to discuss the opportunity of selling Quantum you will receive 10,000 InPartnership Points worth £100 and another 15,000 points worth £150 once the meeting has been held. So that's, £250 for you to exchange for a wide range of digital gift cards from electronics to fashion

WHY SELL VEEAM WITH QUANTUM STORAGE SYSTEMS?

Quantum, together with Veeam, enables customers to:

- > Simplify their architecture (e.g. less components to install, manage, and update) and decrease administration/ OPEX costs.
- > Reduce infrastructure costs by decreasing the size of the data centre footprint, power consumption, and bandwidth requirements, while enhancing data availability and residency.
- > Achieve 3-2-1 rule compliance with only two vendors (Quantum and Veeam) to ensure VM, application and data recovery.
- > Attain compliance with new regulations (GDPR) and protect against malware and ransomware attacks.
- > Leverage Veeam integration with Quantum deduplication appliances powered by DXi software that integrates the Veeam Data Mover, enabling better performance with less cost through features such as Instant VM Recovery® and synthetic full backups.
